The Multiplex Beermaster

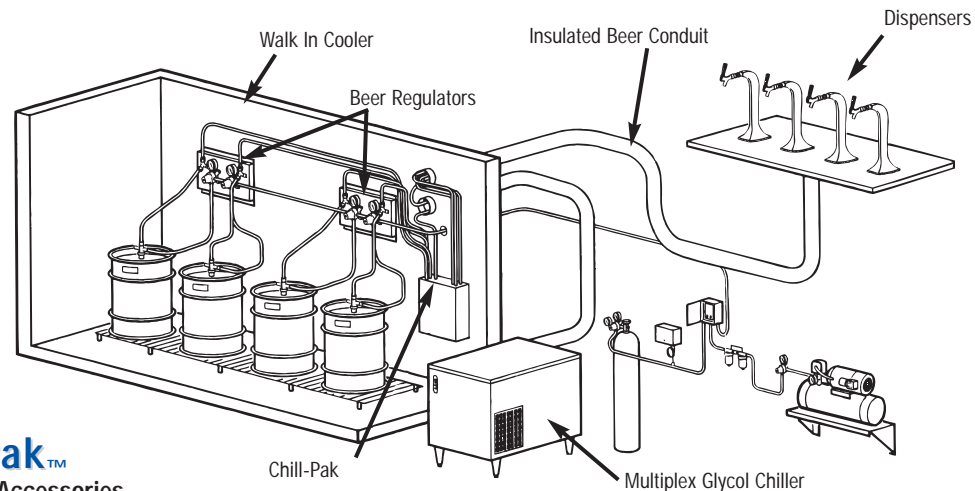

Long Draw Draught Beer Delivery System

Remote glycol chiller units maintain consistently cold product runs from the beer keg cooler to each dispensing tower. Circulating glycol coolant maximizes cooling capacity, insuring you a cold beer every time.

Multiple dispensing stations operate from one central unit.

Choose from hundreds of conventional and specialty beer tower designs in brass, chrome, stainless steel, and ceramic finishes.

Complete turnkey systems are backed by a worldwide service and installation network.

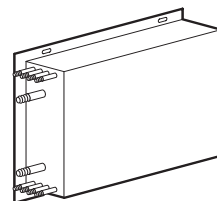

Chill-Pak™ Super Chill Beer Accessories

The Chill-Pak System

Special add-on components designed to provide Colder draught beer and frosted towers

Chill-Pak super chiller delivers beer up to 10° colder to your faucets.

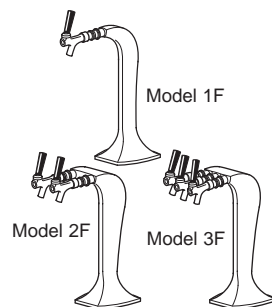

Mounts under your bar, on a wall, or in the walk-in cooler. Uses glycol from existing or added power pack to flash-cool the beer before it is dispensed.

Chill-Pak frosty towers

Enhances the presentation of super-chilled beer with their iced exterior surfaces.

Uses glycol from existing or added power pack.

Beermaster Glycol Chillers

Features

- Specially designed for operation in high-ambient areas – tested at 90° F
- Cold circulating glycol coolant with circulating pump and motor
- Stainless steel cabinet
- R-404A Refrigerant

Benefits

- Remote location frees valuable space under bar
- Maximizes cooling capacity, minimizes foaming; keeps cold beer always on tap
- Ensures durability, easy to keep clean
- Complies with all environmental regulations

Multiplex

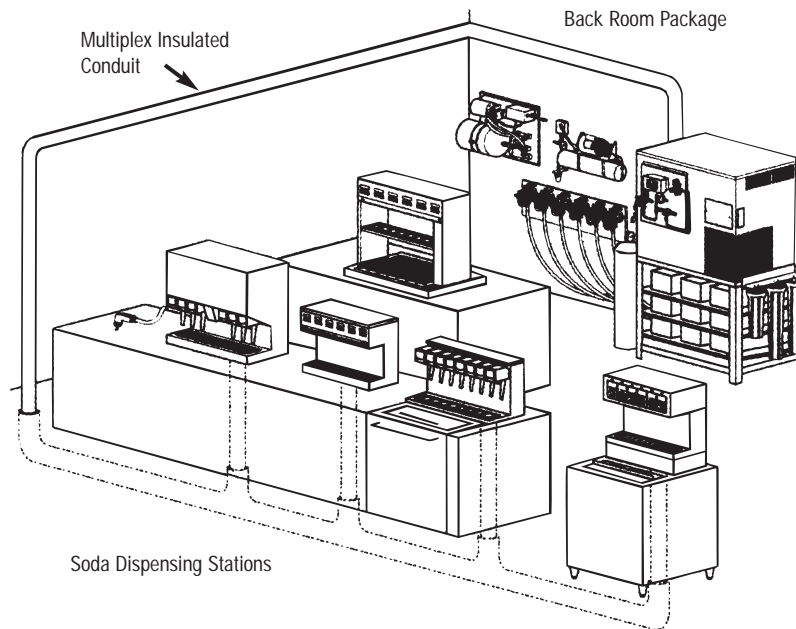

Multiplex Soda Factory™ Systems

“The Original Multiplex”

Count on Multiplex reliability to get where you're growing

Multiplex Soda Factory systems are recognized as the highest peak capacity, most reliable, and highest quality soft drink dispensing systems available today.

The Soda Factory supplies multiple dispensing stations from 50 to 500 drinks per hour. Conduit can run up to hundreds of feet from the remote refrigeration unit.

Back Room Package

Syrup stand organizes the backroom on one compact unit in a remote location away from the serving area.

More efficient cooling makes the difference

Multiplex remote refrigeration units produce cold carbonated water and chills incoming water and syrup prior to delivery to dispensing towers.

Refrigeration units utilize an ice bank reserve cooling system that does not require secondary ice source for refrigeration – saving utility and maintenance costs.

Customize your dispensing system

Multiplex can provide a wide variety of standard and customized towers. Portion control towers can significantly improve speed of service and control beverage foaming.

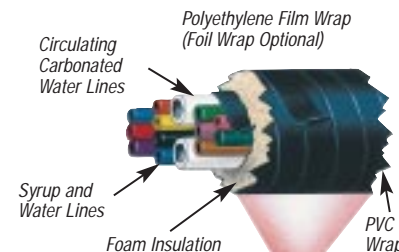

The Right Dispensing Stations to fit every need

Different types of dispensers can easily be combined in the same Soda Factory, giving maximum flexibility.

Multiplex Conduit

Multiplex conduit is the standard of the industry.

Engineered To Perform

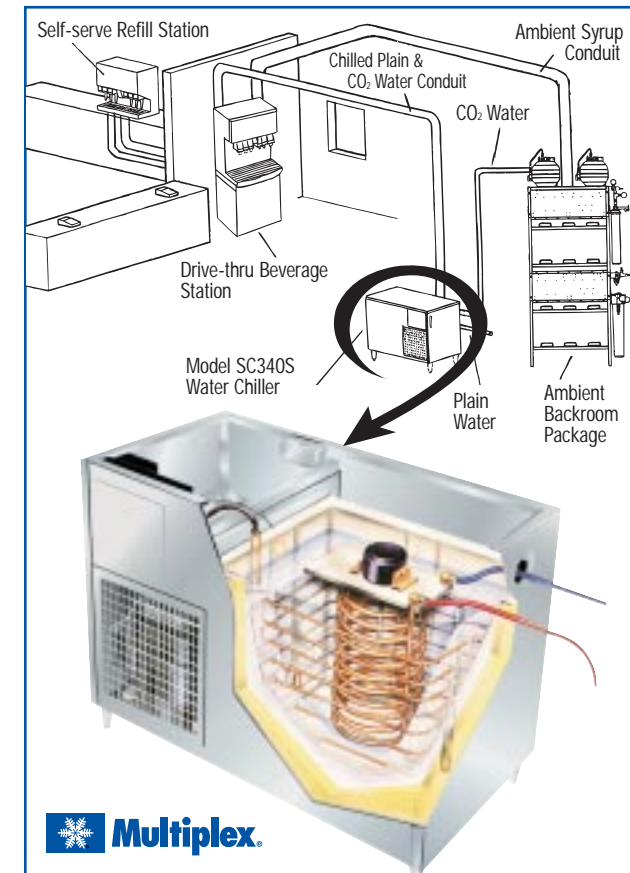

All Multiplex beverage systems carry full Agency approvals (UL, NSF, ETL) and have stainless steel cabinets as standard equipment at no additional charge.

Warranty

All Multiplex beverage systems carry a two-year parts and a five-year refrigeration compressor warranty.

Each refrigeration system is 100% tested prior to shipment and backed by a worldwide service and installation network.

Supercharge
your Beverage
System with ...

JUST PLUG INTO YOUR EXISTING BEVERAGE SYSTEM

- Serve 100 to 125 more soft drinks between cold plate ice bin refills
- Zero downtime
- Ring up more profits
